Turkey Tactical: Authorities issue nationwide inclement weather warnings for March 18-24; maintain vigilance

Current Situation:

- Turkey's General Directorate of Meteorology (MGM) issued nationwide weather warnings beginning on March 18 and lasting until March 24.
- Temperatures are expected to fall by 10-15 degrees Celsius in northwestern areas of the country, including Ankara, Istanbul, and Izmir, with temperatures in Ankara expected to drop to minus four degrees Celsius.
- The MGM also forecasts rain and showers in Turkey's western regions and prospects for frost and icing in parts of the country.

Recommendations

1. Those operating or residing in Turkey between March 18-24, including in Ankara, Istanbul, and Izmir, are advised to maintain vigilance and take necessary precautions due to anticipated inclement weather conditions.
2. Remain cognizant of risks to driving emanating from icing and frost.

3. Remain cognizant of authorities' updates concerning warnings issued for inclement weather.
4. Avoid strenuous physical activity during extreme cold and wear sufficient warm clothing outdoors.
